Product Description

J&M's ROKKER Performance series 6X9" speakers are designed as component/replacements for most aftermarket 6X9" saddlebag-lid speakers as installed on 1998 and later Harley Baggers.

Spec'd at 2-4 ohms impedance and 200 watts maximum input (150w RMS - 91db sensitivity), these speakers provide the ultimate in raw audio power and include the high-output center-mounted tweeter.

Lightweight one-piece woven-fiber driver cone with super-rigid metal basket design.

High-density magnet structure, specially coated to maintain flux-strength integrity even at extreme operating temperatures.

Custom center-mounted high-output tweeter.

These are the most efficient 6X9" speakers you can buy for your Harley and they will perform extremely well when used with a medium to high-powered accessory amplifier.

Installation into 1998 & Later Harley Saddlebag Lids

1. Remove the installed aftermarket 6X9" speakers.
2. Hold the ROKKER Performance series 6X9" speaker in place, to see if it will be necessary to re-shape the adapter ring to properly seat the ROKKER speaker in place.
3. If modifications to the adapter ring are necessary (as is the case with the Fosgate cut-lid adapter rings) re-shape carefully with a good Dremel or similar tool.
4. Mount the speaker securely using the 4 mounting screws previously removed.
5. Using the included wiring harness, splice into the existing wiring as necessary to maintain the correct speaker polarity and wiring harness integrity. (The large spade on the ROKKER speaker is +)
6. Repeat the entire process with the opposite saddlebag lid.
